### Exploring Climate Solutions Webinar Series

*Brought to you by the Governor's Council on Climate Change (GC3)*

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **November 10<sup>th</sup> lunchtime webinar**, participants will learn about strategies to energize your business community through your municipality's participation in the **Clean Energy Communities** program. Across the State, communities are working to energize Main Street with energy efficiency solutions to help small businesses reduce energy costs. Local energy task forces are partnering with the clean energy communities to engage the business community and increase awareness of EnergizeCT, energy efficiency and sustainability. Learn how to get involved and how to begin a comprehensive outreach campaign to the businesses in your community.

Speakers will also present on the **Energize CT Business Sustainability Challenge (BSC)**, the successful utility sponsored program that helps businesses to develop strategies that reduce energy costs in a "Whole Business" approach. Providing the technical and financial resources needed to tackle common business issues like utility costs, waste and recycling costs, employee engagement and brand reputation, the BSC provides a comprehensive entry point for businesses to access all energy efficiency offerings from both utilities.

Please join us to learn more about this innovative initiative by registering [here](#).
